## INSTRUCTIONS

- All ingredients in this recipe should be measured raw. Practice safe food handling techniques including
- washing of hands before and after handling raw meat. After cutting raw meats, wash all surfaces with hot, soapy water.
- We recommend pre-portioning and freezing any extra food you don't plan to feed after 72 hours. Frozen food is best offered up to 1 month after freezing for optimal nutrition.
- All nuts, seeds, grains, tablet based supplements, and produce used in this recipe should be finely chopped for better digestibility, bioavailability, and distribution. A food processor works great for this step!
- Fine powder supplements and oils must be thoroughly mixed into recipe.
- Capsule/perle ingredients must be opened for better distribution.
- Fish oils or other sources of omega 3 fatty acids should be added at the time of feeding.
